

Present: Peter, Jon, Bing, Lynn

1. The minutes of the January 16th meeting were approved with the correction of deleting Elizabeth's name from the list of attendees.

2. Community Choice aggregation: Peter shared that the state DPU has given the go-ahead at last on this process, and the designated aggregator Colonial Power is scheduling a meeting with the 13 towns who are interested. It will be a slow process.

3. The solar Invitation to Bid issued by FRCOG was discussed (it was later cancelled; see discussion in next month's meeting).

4. Other projects:

- Other solar: possibly at the Transfer station? We'll need to wait to see how much \$\$ might be left over after the solar bids come in. There was a discussion about a possible expanded shed if a new compactor is bought; however, Jon shared that this is a very preliminary discussion.
- Mass Save/Home Energy audits: we decided to check back with Alyssa to see if she still might have Technical Assistance funding to assist us in developing a program to help town residents with energy efficiency improvements.
- Colrain Central School: Lynn will be meeting with the Mohawk Maintenance/Facilities group on next Monday to begin the conversation about possible improvements there (with funding from the next cycle; i.e. well into the future).

Meeting adjourned at 7:35 pm.
